

# Jose Tupayachi

Knoxville, TN | jtupayac@vols.utk.edu | 661 365 5289 | jtupayachi.github.io

Experienced Python developer and Large Language Model (LLM) expert with a strong track record in designing, implementing, and deploying advanced machine learning systems. Skilled in leveraging Retrieval-Augmented Generation (RAG), vector databases, and API-driven solutions to enhance real-time NLP applications. Proven collaborator with interdisciplinary teams, focused on delivering impactful, data-driven products.

## Education

University of Tennessee, Knoxville   PhD Candidate in Industrial and Systems Engineering	Aug 2024 - Present
Advisor: Dr. Xueping Li, Co-advised: Dr. Haowen Xu	
University of Tennessee, Knoxville   MS in Industrial and Systems Engineering	Aug 2022 - Jul 2024
GPA: 3.9	
Pontifical Catholic University of Peru   BS in Industrial Engineering	Mar 2014 – Jan 2020

## Publications

- **Drone-aided delivery methods, challenges, and the future: A methodological review**  
X Li, J Tupayachi, A Sharmin, M Martinez Ferguson  
*Drones* 7 (3), 191 (2023)
- **Towards next-generation urban decision support systems through AI-powered construction of scientific ontology using large language models—A case in optimizing intermodal freight**  
J Tupayachi, H Xu, OA Omitaomu, MC Camur, A Sharmin, X Li  
*Smart Cities* 7 (5), 2392-2421 (2024)
- **Automating Bibliometric Analysis with Sentence Transformers and Retrieval-Augmented Generation (RAG): A Pilot Study in Semantic and Contextual Search for Customized Literature**  
H Xu, X Li, J Tupayachi, JJ Lian, OA Omitaomu

*arXiv preprint arXiv:2405.19255* (2024)

## Funded Projects Developer

RECOIL   Cognitive Freight Transportation Digital Twin for Resiliency and Emission Control Through Optimizing Intermodal Logistics	Nov 2021 – Present
• Developed and integrated digital twin models for large-scale freight transportation networks, leveraging data from diverse transport modes (road, rail, waterway) to enhance system performance, minimize emissions, and	

increase resilience.

- Utilized advanced forecasting models to analyze transportation systems' responses to climate change and extreme weather events, enabling data-driven, real-time decision-making such those applicable to EV charging stations.
- Applied Large Language models to improve transportation planning decision making, enabling more accurate tradeoff analysis among cost, time, and emissions.
- Designed a dynamic real-time feedback loop for digital twins, utilizing sensor data and scrapping technology to continuously optimize system performance based on real-world conditions.
- Collaborated with academic researchers, the Oak Ridge National Laboratory, and industry partners to develop scalable solutions for technology transfer, focusing on reducing emissions and enhancing resilience in freight and supply chains.

**Funding Agency:** U.S. Department of Energy's Advanced Research Projects Agency-Energy (ARPA-E)

**Project Number:** #DE-AR0001780

**SmartShots** | Cross-Platform Application to Improve Childhood Vaccination Rates in Tennessee December 2022 – Present

- Enhanced vaccination tracking with real-time data updates, notifications, and integrated alerts for users and healthcare providers.
- Developed a scalable backend system using Dart and Flutter, ensuring smooth functionality across platforms and enhancing the user experience.
- Integrated community health data to offer users real-time access to nearby vaccination providers and appointment availability.
- Collaborated with the Tennessee Department of Health and local health agencies to align the app with state public health objectives and needs.
- Led user testing and incorporated feedback to improve the app's inclusivity, addressing issues such as misinformation and disparities in healthcare access.

**Funding Agency:** Tennessee Department of Health

**Active Caregiver's Toolkit (ACTAPP)** | Mobile Application to Promote Physical Activity Among Rural Appalachian Caregivers at Risk for Cardiovascular Disease (CVD) Jul 2024 - Present

- Development of the ACTAPP as a digital solution for rural Appalachian caregivers, aiming to reduce cardiovascular disease risks through targeted physical activity interventions.

**Funding Agency:** Hillman Emergent Innovation (HEI)

## Awards & Scholarships

---

**51<sup>st</sup> Conference on Computers and Industrial Engineering (CIE51)** *Best Paper Award: "Emerging AI and Cognitive Digital Twin Technologies Towards Low-Carbon Multimodal Freight Transport Systems – Sustainable Transport Systems"*

Sydney, Australia December 9–11, 2024

**IISE Data Analytics & Information Systems (DAIS) Student Mobile App Competition**

2024 Winners - SmartShots Project, Montreal

**Graduate Fellowships and Awards**

*Holiday Fellowship:* 2022, 2023, 2024

**HIDA Helmholtz Visiting Researcher**

*Year:* 2024 - Awarded but not taken.

## Work Experience

---

**Data Engineer** | Indra – Full-time

Jan 2022 – Aug 2022

- Developed and maintained data pipelines using Python and Shell scripting to streamline big data workflows.

- Worked with Apache Spark, Hadoop, and HQL for distributed data processing, querying, and large-scale data migration, including data migration from Oracle and SaaS to PySpark.
- Implemented Jenkins-based deployment strategies for automating ETL processes and job scheduling.
- Ensured data quality and performance through rigorous data governance practices and optimization techniques.
- Managed memory allocation for distributed processing tasks to optimize resource utilization and improve processing efficiency.

**Data Analyst** | Enel Group – Full-time

Nov 2020 – Dec 2021

- Improved collection systems using a "Payments to Customer" strategy, leveraging unsupervised clustering techniques to enhance efficiency.
- Implemented dashboards PowerBi enabling strategic insights at Enel Peru.
- Managed SQL and T-SQL databases, ensuring data quality and accurate reporting for Enel's Business Partners in Salesforce.
- Developed a desktop application PyQT to streamline invoice collection verification, and automated digital invoice processing.

## Community Service

---

### University of Tennessee Graduate Student Senate

Senator, Industrial and Systems Engineering, 2024–2025

Represented ISE students, advocated for academic and professional development opportunities, and fostered graduate student engagement across campus.

## Conferences & Paper Review

---

### Paper Reviewer:

Scenario Decomposition Approach for Mobile Multi-Agent Monitoring under Failure Submitted to *Transportation Research Part C: Emerging Technologies* - November 2024

### Conference Presenter:

Federated Learning Fault Detection: Towards a Decentralized Machine Learning Framework - IISE 2023

Rule-based Automated Cancer Staging from Scanned Pathology Reports - IISE 2024

Empowering Simulation Modeling: An Automated Ontology Framework Enhanced by Large Language Models - INFORMS 2024

Conversational Geographic Question Answering: LLMs & Continuous Retrieval-Augmented Generation - SIGSPATIAL 2024

## Technologies

---

**Languages:** Python, SQL, Bash, Dart, PHP

**Frameworks:** Django, Flask, TensorFlow, PyTorch, Flutter, Laravel, React

**ML/NLP Tools:** LlamaIndex, LangChain, HuggingFace Transformers, RAG

**Databases:** PostgreSQL, MongoDB, Elasticsearch, MySQL

**DevOps:** Docker, Kubernetes, Git, Jenkins

**Optimization:** Networkx, Gurobi, cplex
